Bonding Blanke Aqua Shield to Stainless Steel Drains (Drains Unlimited)

With this letter, Blanke Corporation confirms that Blanke Aqua Shield waterproofing membrane and Blanke Aqua Seal can be used together to create a waterproof connection to stainless steel drains from Drains Unlimited when installed properly in accordance with the current Blanke installation instructions.

Blanke recommends using the full surface area of the flange of the drain to adhere Blanke Aqua Shield with Blanke Aqua Seal onto. As surface prep and to improve the adhesion, the stainless steel flange shall be mechanically roughened prior to adhering the membrane.

Blanke Corporation will not be responsible for the workmanship of the waterproofing connection(s) or the general applicability or performance of the drains.

Please follow all recommended industry standards, installation procedures and manufacturers technical data sheets to ensure a successful installation.

Thank you.

Best,

Kristof Schwarz
President & COO of Blanke Corporation
